4. NSTALLATION

Mounting the Front Light:
1. Loosen the strap by unscrewing the adjusting nut
2. Ensure that the anti-wobble silicone that keeps the light mount in a fixed position on the handlebar is correctly inserted in the inner side of the mount
3. Position the light mount as desired on the handlebar
4. Tighten the mount by passing the strap through the slot inside the adjusting nut and turning this clockwise
5. Attach the light to the mount by inserting the base of the light in the top of the mount and rotating the light 90 degrees

Mounting the Rear Light:
1. Choose the size of silicone strap that fits in the bar where the light will be mounted
2. Click the strap in one of the hooks on the rear light
3. Ensure that the silicone cover is correctly attached to the back of the light
4. Press firmly the light on the seat post
5. Wrap around the seat post and click the lose end of the strap to the free hook on the light

Alternatively, the rear light can be attached to other bars in the bicycle frame or to helmets.

5. OPERATION

Operating the Front Light:

Press the operation button for 3 seconds to turn ON/OFF the light.

Press the operation button to cycle through the different modes:

1. Adaptive mode with light and movement sensors (blue LED indicator)
2. Safety side light (amber LED)
3. Half beam
4. Full beam
5. Flash

During the adaptive mode the light will automatically turn off if no movement is detected after 3 minutes.

Operating the Rear Light:

Press the switch button to cycle through the different modes:

1. Steady low
2. Steady mid
3. Steady high
4. Flash slow
5. Flash fast
6. Flash strobe
7. OFF

Both lights can be charged from multiple energy sources like for example computers, wall adapters and power banks.

The USB cables supplied with the lights MUST not be used to charge other devices other than the Pantala Trail bicycle lights.

Charging the Front Light:

1. Lift the micro USB port cover and insert the provided cable while the other end is connected to a power source like a computer.
2. A red LED indicator will illuminate during charge
3. Remove the light from the source of power when the green LED indicates that charge is completed.

Charging the Rear Light:

1. Lift the silicone cover to access the micro USB port at the back of the light
2. Use the provided USB cable to charge the light by connecting this to a power source
3. A red LED indicator will illuminate during charge
4. Remove the light from the source of power when the green LED indicates that charge is completed.

7. WARRANTY

PANTALA TRAIL warrants the original purchaser of this product that the product is free from defects in material and workmanship for a period of one year.

To activate the warranty please register through the registration form in http://www.pantalatrail.com/warranty/

To make a warranty claim the product must have been previously registered and a proof of purchase should be presented.
